Client Reviews

★★★★★ "Just a quick comment of appreciation for the time and effort that you put into the Option Powers Member and Live Trading Webinars. I get a LOT out of them. My wife walked in while I was on today's session and she commented about what a great job you do and the energy you have. **Awesome process** – enjoying the options world more and more!! - Ralph T.

★★★★★ "I just wanted to say **how much I have gotten** out of our calls, is really a lot. It has been good learning to go over my trades, and look at what I did in hindsight, with your comments and also strategies as it is **good to have it explained**, to clarify what I am reading, and also, most importantly, **managing the** going forward. Thanks very much, and thanks for offering to be available by email. I feel much **more confident** with options, and thanks, I really get the **commitment to helping me** actually make money, the transition from theory to **actually taking money** and that is hugely appreciated, to say the least." - Luann H.

★★★★★ "I'm just thrilled beyond myself about the **Volatility (CELG) trade** using the 'Boing Boing' technique that you talked about at the last Options Boot Camp. I entered it in my **live account** during the class, and I was thrilled to open my account today and see **a gain of well over \$2000 in just a few days** with **very little money at risk!** I figured that if the trade was good enough for you, then it was good enough for me because I've learned to trust you. You are my security blanket! My account is not very big, so normally I would not invest in such an expensive stock. But **you taught me how!** I told all my friends about Options University, and now they all want it! Thank you so much for being my coach. Don't ever leave me!" - Teresa T.

I used to be a financial adviser. Some are better than others, and I've used them in the past myself. But the standard sales pitch and practice for most of them is to toss you into mutual funds for the "long haul" while you pay them fees. Most mutual funds do NOT outperform the general market AFTER you take into account the fees they charge you. After the last market crash of 2007, it took over 5 YEARS just to get back to break even! You can do better!

Markets are hovering near ALL TIME HIGHS as they were in 2007. In addition, many experts are saying that the markets are acting strangely in that bad news is good news, and good news is bad news. Stocks these days have been described as "Fed Addicted". Does that sound safe and sound to you??? You need to learn how to both survive and thrive. Click here to learn something useful for free:
